

## Aluminum Service Poles

# HUBBELL

Hubbell introduces a new line of gray and ivory extruded aluminum service poles. These attractive and durable poles effectively distribute power and telecommunications wiring from above the ceiling to workstations below. They are offered in lengths of 10'2", 12'2", and 15'2", and with a variety of electrical wiring devices. Poles with three service capability have a divider to separate power and low voltage wiring. A

blank pole is also offered which does not have devices nor wiring. In addition to a standard pole, which has two 20 amp duplex receptacles, an isolated ground version is available, as well as a surge suppression version. All poles, except the blank versions, are factory wired with Hubbell Style Line® receptacles. Two Style Line knock-outs are also provided on the same side as the power receptacles for communication outlets.

### Features

- Gray or Ivory powder painted finish
- Extruded aluminum design
- Available with two duplex receptacles
- Available with isolated ground and surge suppression receptacles
- Provided with Hubbell Style Line® devices
- Both power and telecom devices mount to same side of pole

### Benefits

- Attractive, durable appearance
- Strong, light weight
- Convenient electrical power
- Special power requirements
- Reliable performance, attractive appearance
- Attractive, easy cable access
