NOT Plug Resistant<sup>®</sup>**

# The Industry's Best Tamper-Resistant Receptacle

for Residential Applications

Jackson Bradley, Design Engineer, Atlanta, GA

I received the receptacles this morning and am really impressed. I walked around the house plugging many different types of devices and all worked very smoothly.

I have been a design engineer for almost 30 years and know a good design when I see it. You can be proud of this one.

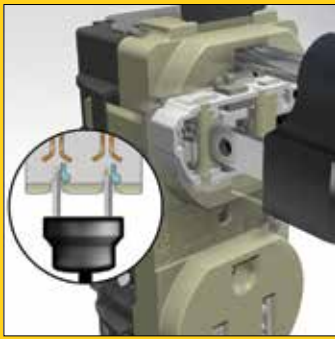

- **Hubbell Patented Technology for a Superior Tamper-Resistant Mechanism**
- **Available In 15 and 20 Amp**
- **Assorted Colors**
- **UL, CSA**

## The Hubbell Solution

Hubbell's patented Cam Action Technology makes inserting a plug as easy as plugging into a standard receptacle. This design has been incorporated into our Industrial, Hospital, Commercial and Residential receptacles. This broad offering ensures the right quality product for all projects.

# Tamper-Resistant - Safety Made Easy

## Patented Cam Action Mechanism

The Hubbell product development team engineered a better way to provide tamper-resistance to our receptacles with our patented cam action mechanism. When a plug is inserted into a Hubbell tamper-resistant receptacle, the cam slides the insulating barrier out of the way. The rotating action eliminates friction, creating a smoother, more reliable insertion. As a result, difficulties due to problematic plugs are minimized.
